

Environmental Policy Expando

Our commitments

Expando AB is a trading company without manufacturing or production. Our business thus has little direct environmental impact.

However, we have a great opportunity to improve the environment by influencing and collaborating with our suppliers and customers. New suppliers are reviewed and evaluated from an environmental point of view before they are accepted. Through an awareness of the choice of purchasing, we can reduce our environmental impact and thereby work actively with our significant environmental aspects.

The identified aspects are

- our purchases from suppliers
- transports
- business travelling

Regular contacts with customers and suppliers contribute to our continuous attention to environmental questions.

Responsibility

The ultimate responsibility for the company's environmental work lies with the CEO. Each employee is responsible for ensuring that the company's guidelines for environmental work are applied in the daily work.

Revision of environmental policy and follow-up of decided measures and goals takes place annually.

The company complies with all applicable environmental laws and regulations. We are constantly working on improvements and corrective measures that are continuously developed through reporting, audits, and customer surveys.
